PROFILE SUMMARY

Detail-oriented Computer Science graduate with a strong foundation in Java Full Stack and MERN Stack development. Proficient in building backend applications using Java, Spring Boot, and REST APIs, along with frontend development using React.js, JavaScript (ES6+), HTML5, CSS3, and Bootstrap. Hands-on experience with MySQL, PostgreSQL, and MongoDB. Passionate about developing scalable, user-friendly applications and eager to contribute to a growth-oriented organization.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Node.js, Express.js, REST APIs, CRUD Operations

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap

Database: MySQL, PostgreSQL, MongoDB, Mongoose, SQL Queries

Tools: VS Code, Git & GitHub, Postman, Maven

EXPERIENCE

Java Full Stack Trainee | *Login360 Software Training Institute, Velachery, Chennai* Aug 2025 – Dec 2025

- Completed intensive Java Full Stack training covering backend and frontend technologies
- Built REST APIs with Spring Boot and integrated with MySQL using JPA/Hibernate
- Developed dynamic frontend interfaces with React.js, HTML5, CSS3, and Bootstrap
- Practiced CRUD operations, API testing with Postman, and version control with Git

MERN Stack Intern | *KnackForge Soft Solutions Pvt. Ltd., Ambattur* Feb 2026 – Mar 2026

- Built and consumed RESTful APIs using Node.js and Express.js for 3+ backend modules
- Developed reusable React.js components with state management using hooks (useState, useEffect)
- Designed and queried MongoDB collections to store and retrieve dynamic application data
- Collaborated on version control using Git & GitHub across feature branches
- Gained hands-on experience in the complete MERN Stack development lifecycle

PROJECTS

Banking Management System | *Java | Console Application* Aug 2025 – Dec 2025

- Developed a console-based application simulating real banking operations including account creation, deposit, withdrawal, and balance inquiry for 100+ simulated user accounts

- Applied OOP principles — encapsulation and modularity — to organize clean, maintainable code across multiple classes
- Used ArrayList to dynamically manage multiple user accounts and implemented robust input validation
- Improved Java control structures and method-based programming through real-world problem simulation

GitHub: github.com/mhd-haarish07/Banking-management-system

E-Commerce Men's Wear Website (Full Stack) | *MERN Stack* | *JWT* | *Razorpay* Aug 2025 – Dec 2025

- Frontend: Developed a fully responsive React.js (Vite) storefront with 45+ product listings, featuring live search, category & price filters, pagination, shopping cart with coupon codes, and wishlist using Context API and reusable hooks/components
- Backend: Built a RESTful API with Node.js and Express.js implementing JWT-based authentication, password hashing, protected/role-based routes, and full CRUD endpoints for products, orders, reviews, addresses, and inventory
- Database: Modeled and queried MongoDB collections with Mongoose (User, Order, Review, Address, Stock) for persistent storage of users, orders, reviews, and live inventory data
- Integrated the Razorpay payment gateway (test mode) with server-side signature verification (HMAC-SHA256) for secure checkout, alongside a multi-step address → payment → confirmation flow
- Built a role-based admin dashboard for order-status management, live stock/inventory control, and sales analytics, with an order-tracking timeline and toast notifications across the app

EDUCATION

Bachelor of Computer Science | *Jamal Mohamed College (Autonomous), Tiruchirappalli* 2022 – 2025

CGPA: 8.04 | Relevant Coursework: Data Structures, DBMS, Object-Oriented Programming, Operating Systems, Computer Networks

CERTIFICATIONS

Java Full Stack Development | *Login360 Software Training Institute, Velachery* Aug 2025

Key Skills: Java, Spring Boot, HTML, CSS, JavaScript, React.js, MySQL
